

Contoh

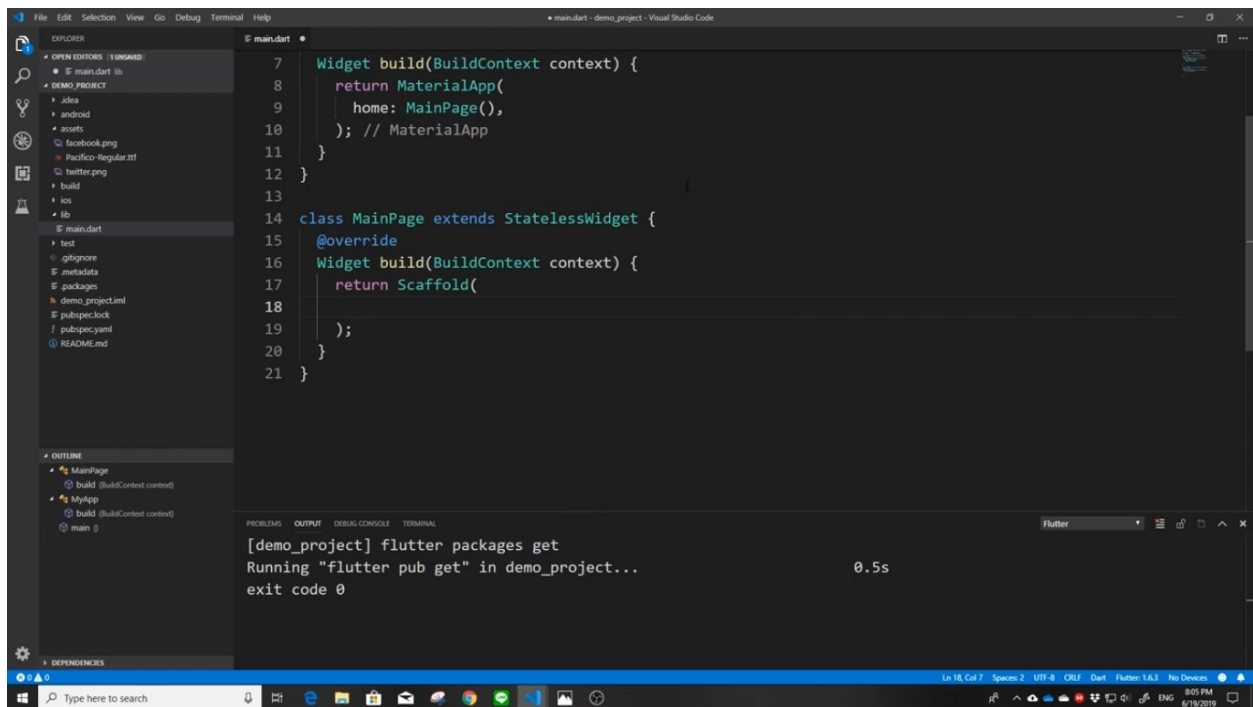

New project

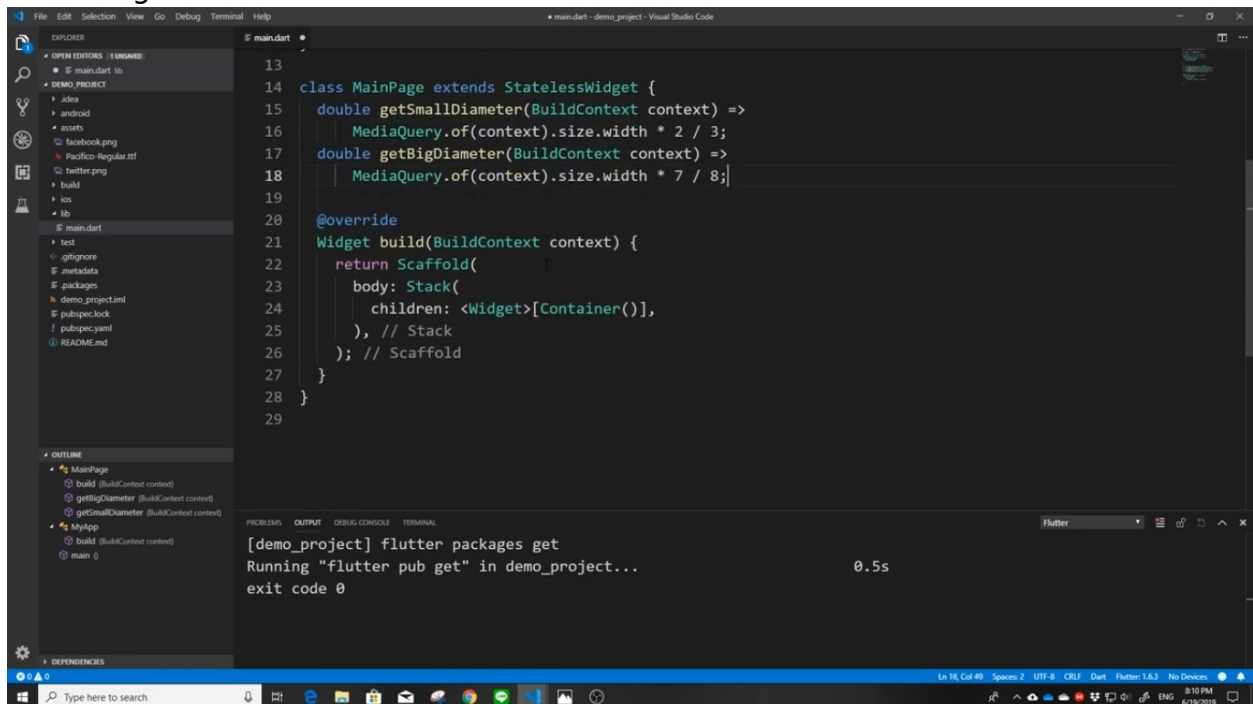

Disini ada folder asset

Dan ada font juga
Langsung saja buat
Stl
Home dipisahkan

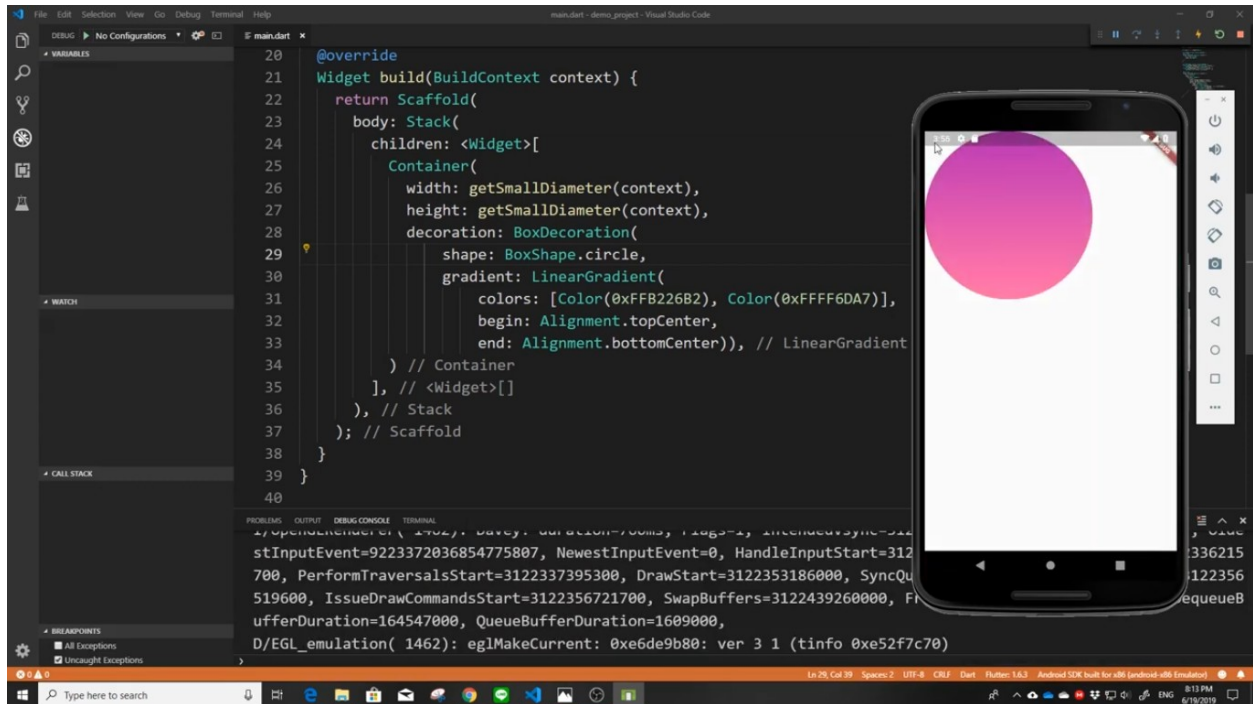

Body nya stack didalam stack buat 2 lingkaran
Buat fungsi untuk ukuran besar dan kecil

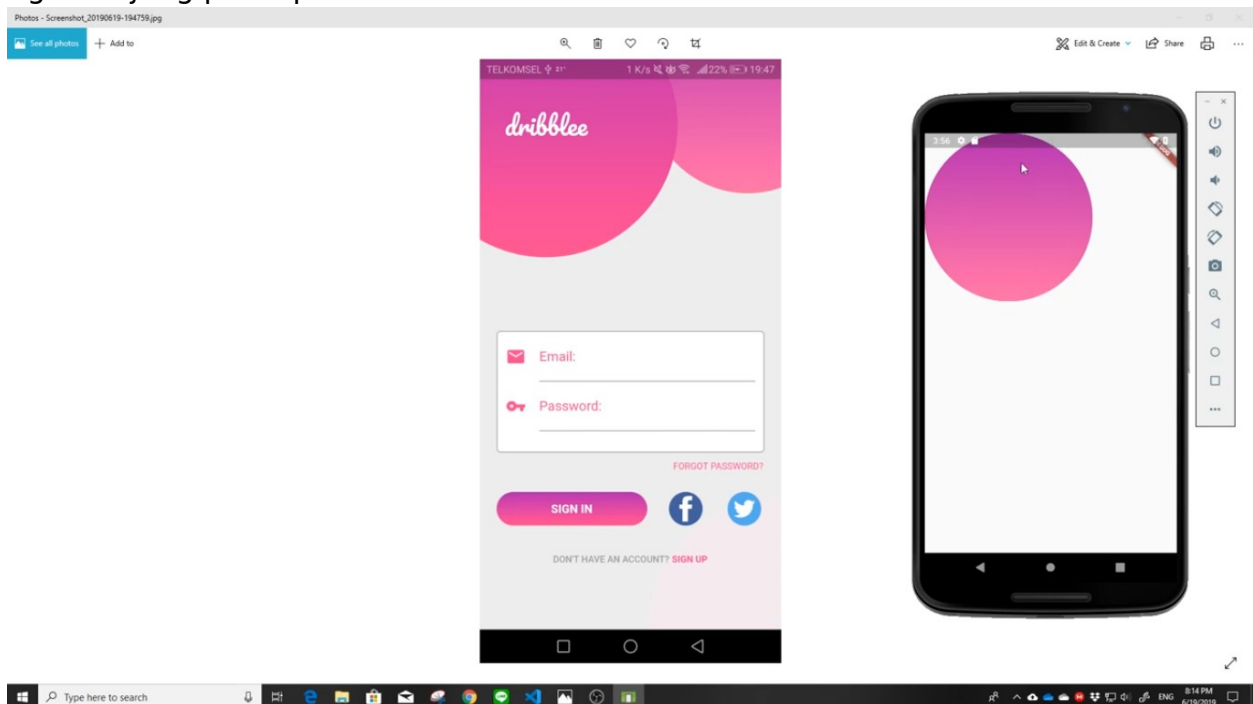

Kembali kedalam container buat satu lingkaran kecil

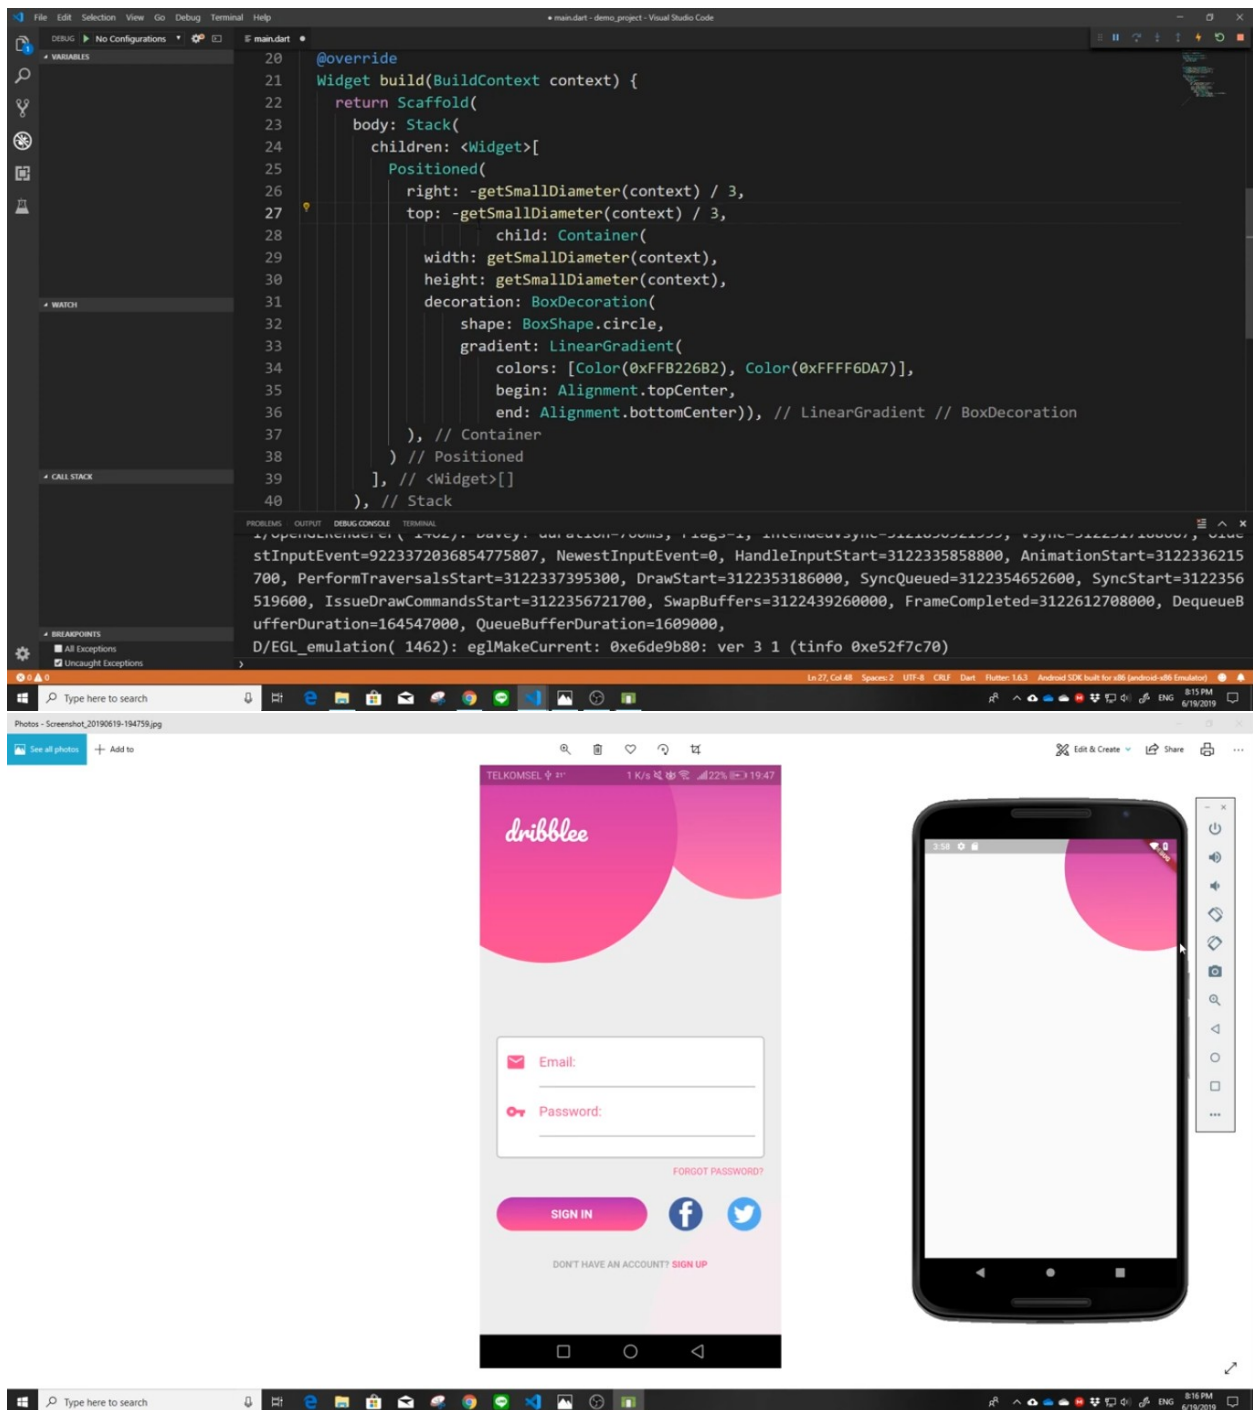

Lalu deocraton

Sudah
Lingkaran kecil digeser
Agar diujung pakai position

Container refactor widget positon
Right buat mundur -
Top juga mundur

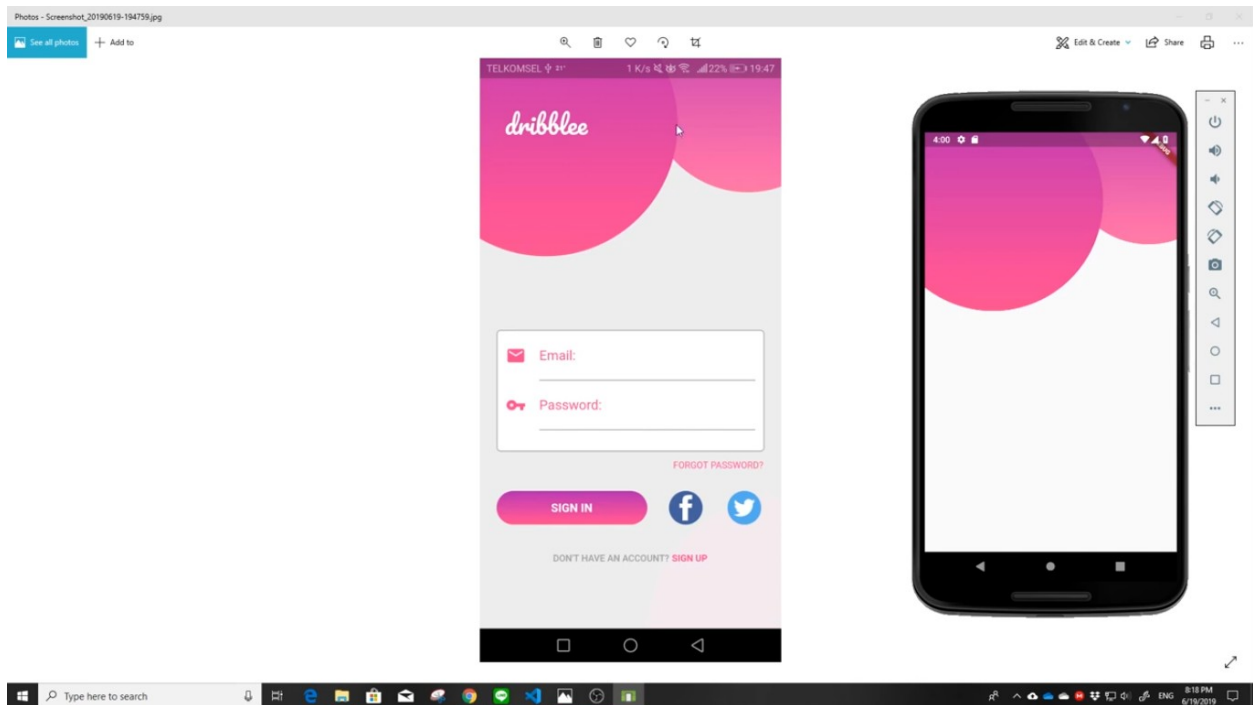

Tembus layar buat linkaran kedua
Sama

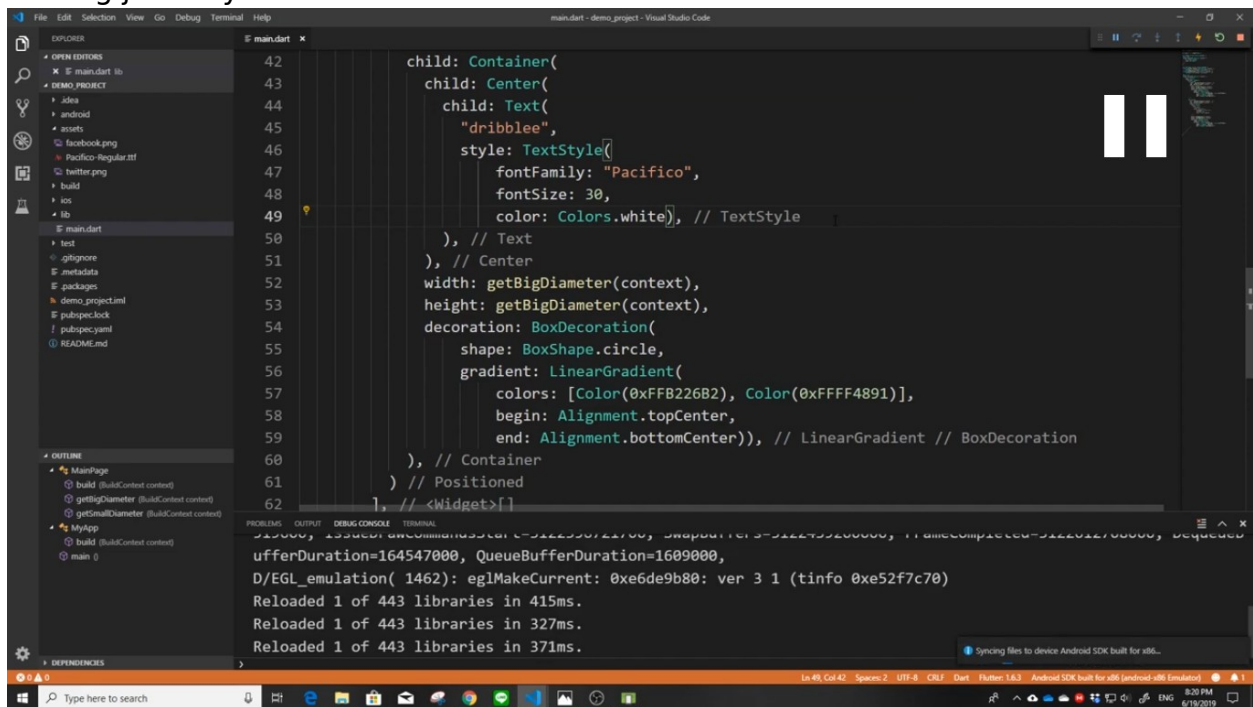

```
22  Scaffold(BuildContext context) {
23    return Scaffold(
24      body: Stack(
25        children: <Widget>[
26          Positioned(
27            right: -getSmallDiameter(context) / 3,
28            top: -getSmallDiameter(context) / 3,
29            child: Container(
30              width: getSmallDiameter(context),
31              height: getSmallDiameter(context),
32              decoration: BoxDecoration(
33                shape: BoxShape.circle,
34                gradient: LinearGradient(
35                  colors: [Color(0xFFB22222), Color(0xFFFFE08C)],
36                  begin: Alignment.topCenter,
37                  end: Alignment.bottomCenter), // LinearGradient // BoxDecoration
38                ), // Container
39              ), // Positioned
40            ], // <Widget>[]
41          ), // Stack
42        ); // Scaffold
```

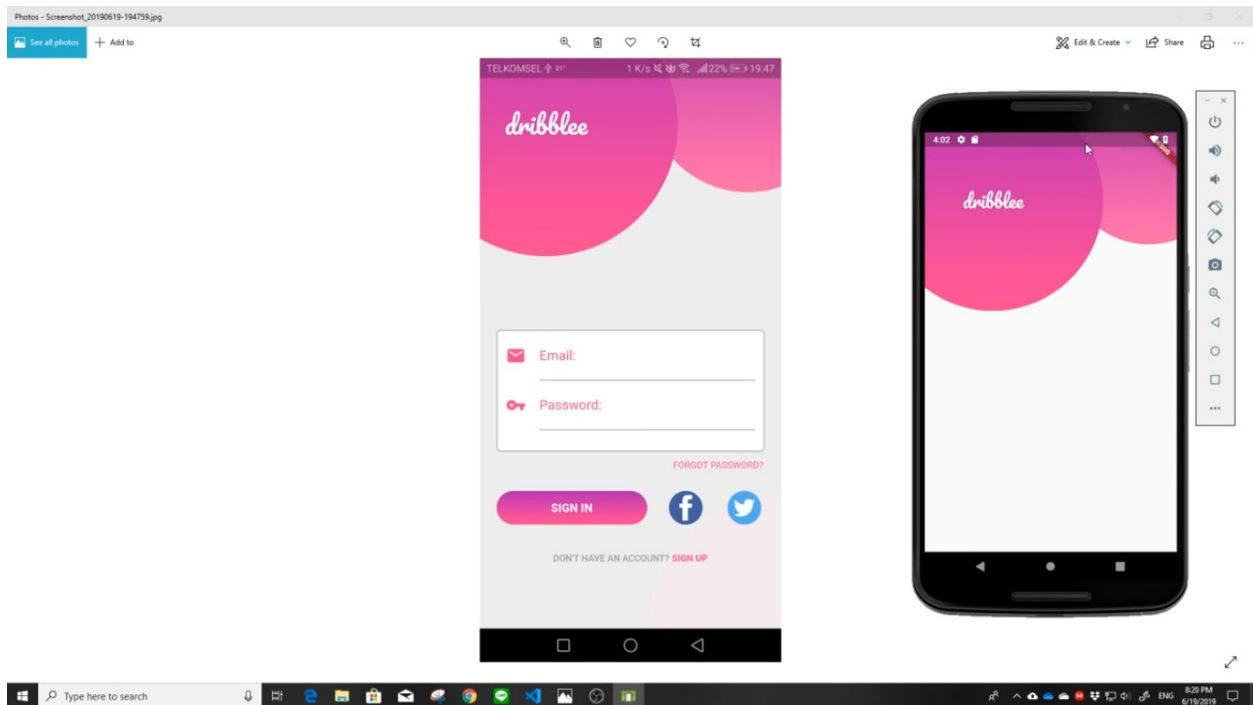

Copy
Ubah menjadi yg besar
Right mundur 4

```
36    ), // Container
37  ), // Positioned
38  Positioned(
39    left: -getSmallDiameter(context) / 4,
40    top: -getSmallDiameter(context) / 4,
41    child: Container(
42      width: getBigDiameter(context),
43      height: getBigDiameter(context),
44      decoration: BoxDecoration(
45        shape: BoxShape.circle,
46        gradient: LinearGradient(
47          colors: [Color(0xFFB22222), Color(0xFFFFE08C)],
48          begin: Alignment.topCenter,
49          end: Alignment.bottomCenter), // LinearGradient // BoxDecoration
50        ), // Container
51      ), // Positioned
52    ], // <Widget>[]
53  ), // Stack
54  ); // Scaffold
55 }
```

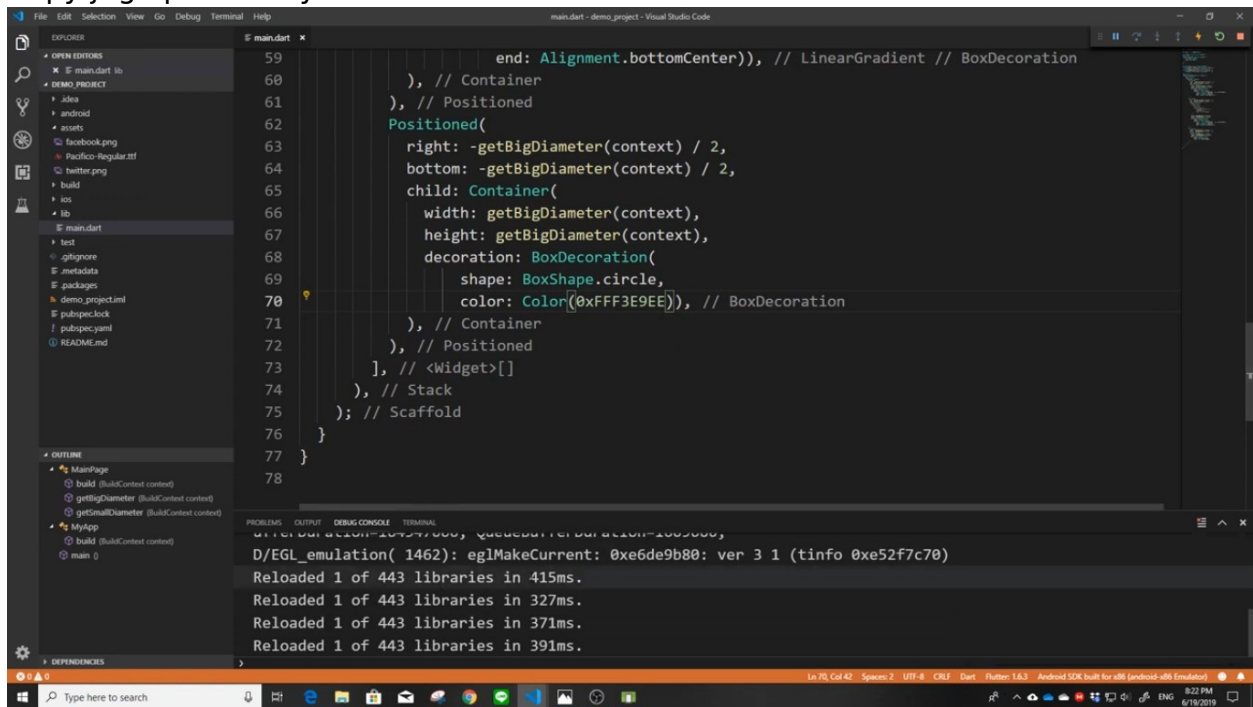

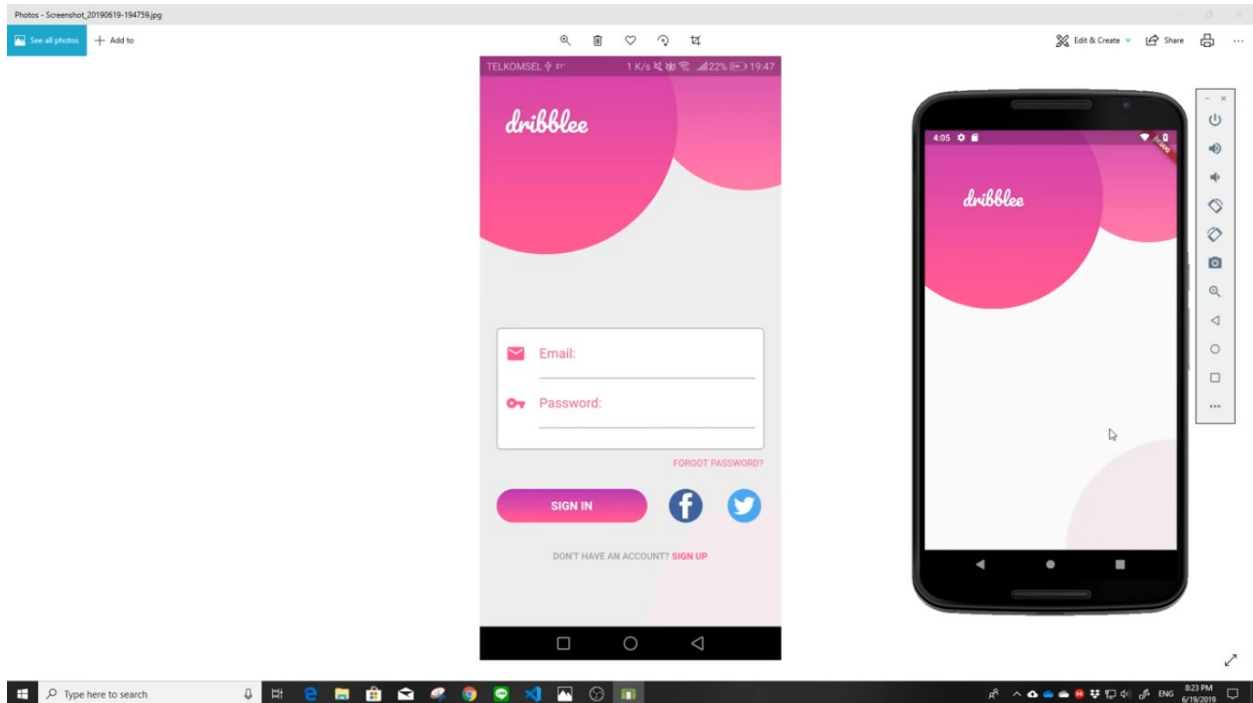

Pasang judul nya

Bagian belakang ada lingkaran kecil juga
Copy juga position nya

Latar belakang menjadi abu nanti diubah scafoold

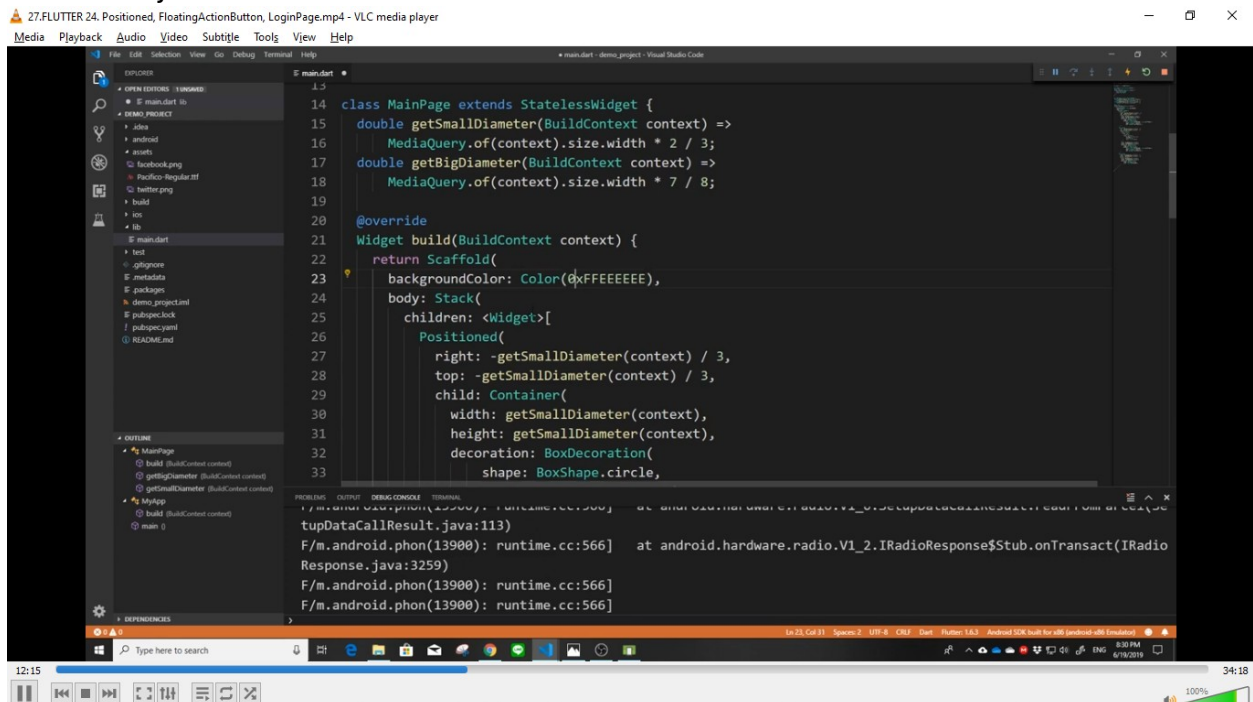

Tambah lemen yg lain

Nanti ada container ada email dan password

Untuk turun kebawah tersusun guna listview

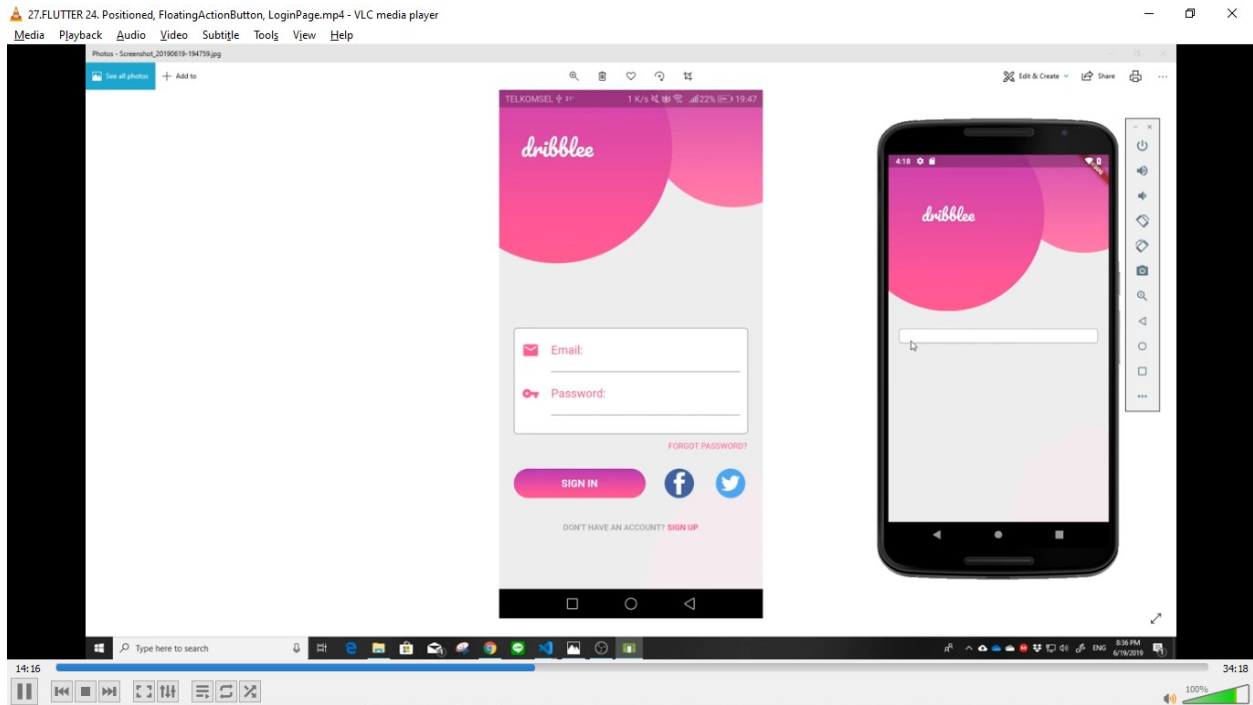

Listview menjadi tempel dibawah buat align

Ubah menjadi abu

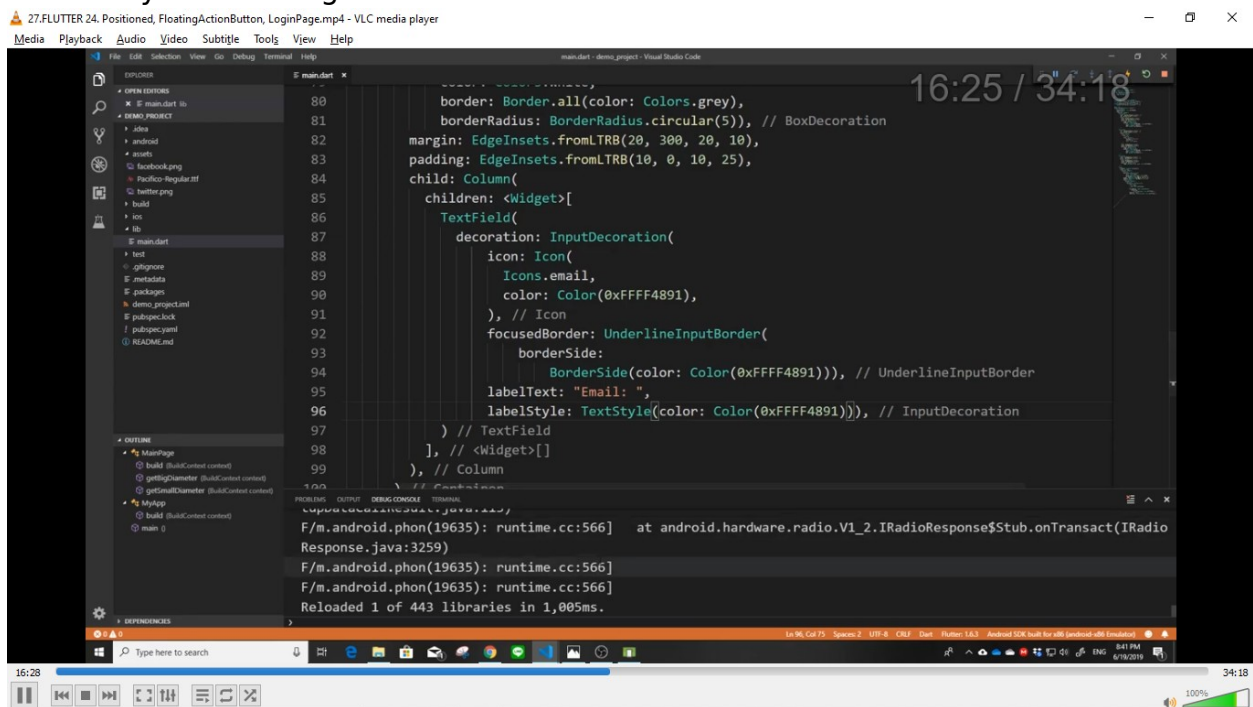

Align buat listview majdi bawah

Ini ada containe belum ada isinya

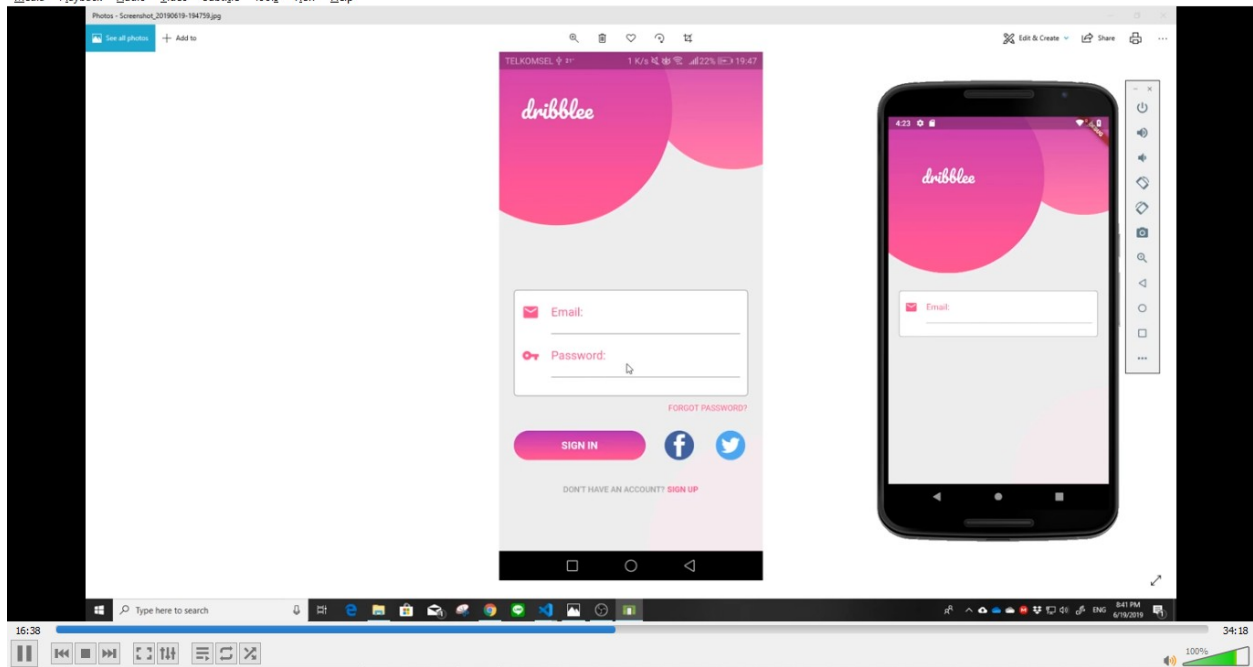

Child isinya column agar kebawah

Sudah ada satu buah

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

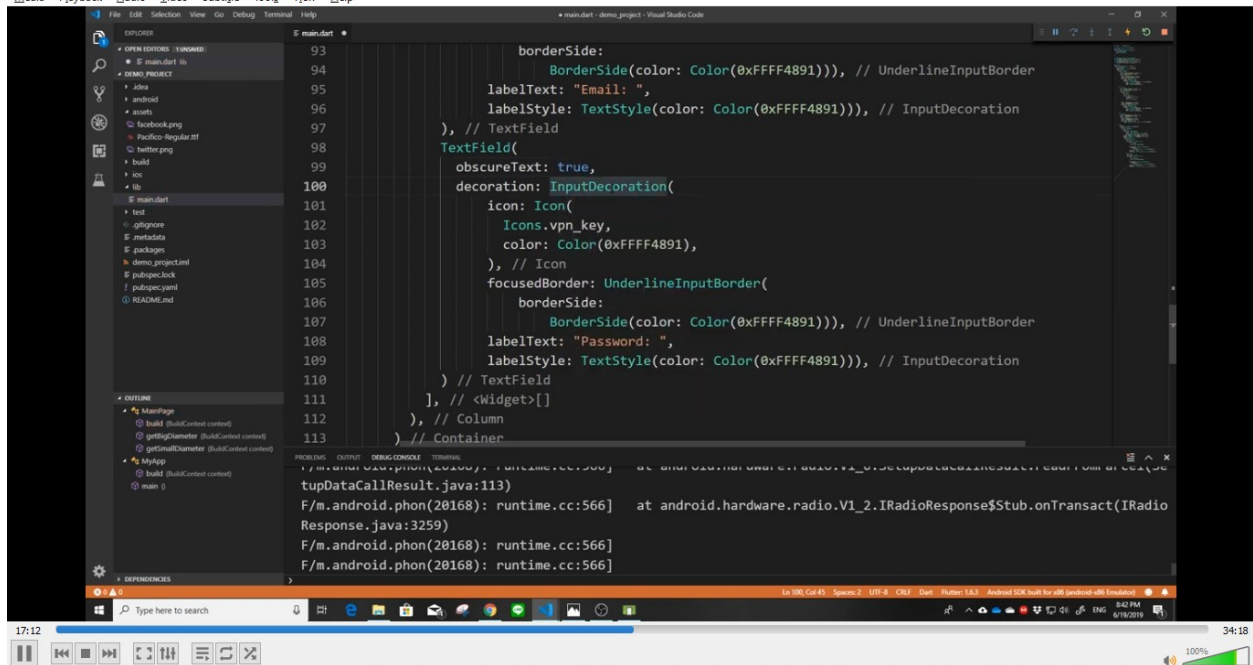

Media Playback Audio Video Subtitle Tools View Help

Sekarang copy saja

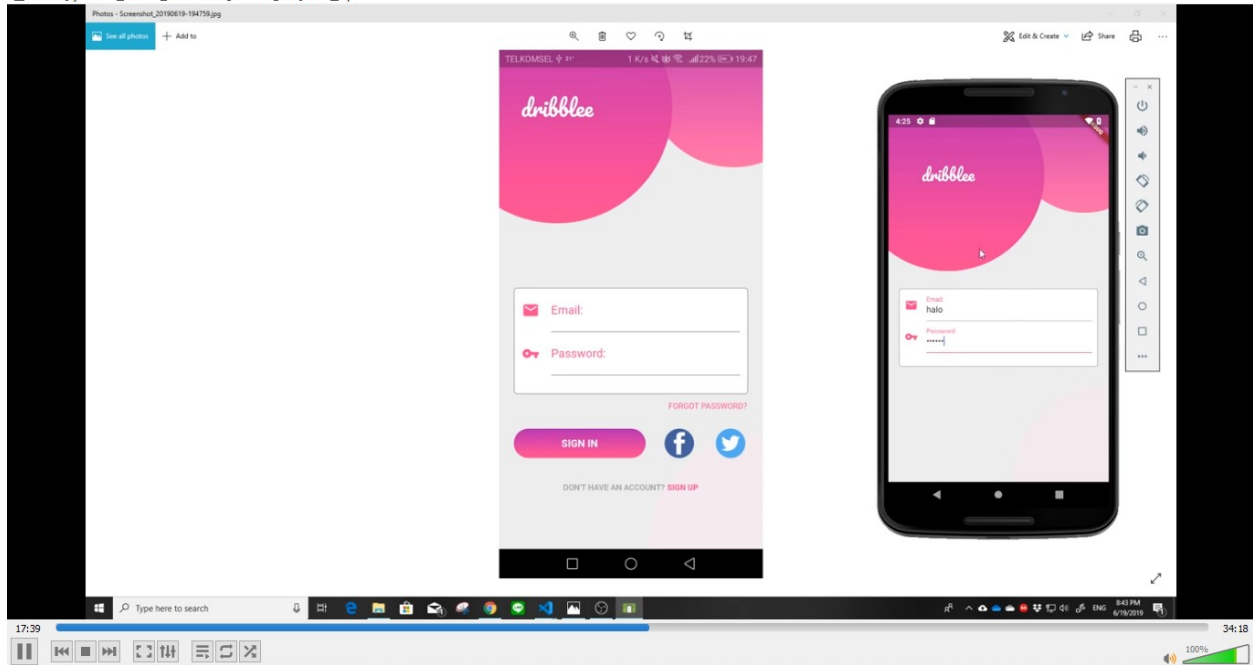

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

Media Playback Audio Video Subtitle Tools View Help

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

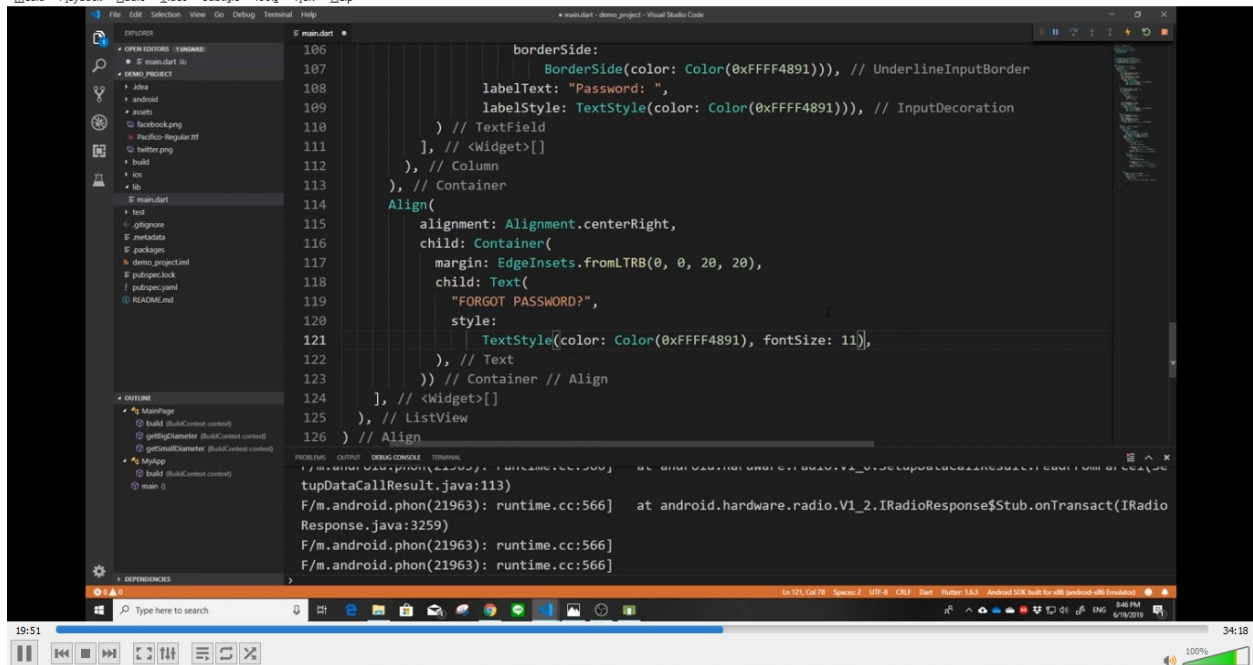

Media Playback Audio Video Subtitle Tools View Help

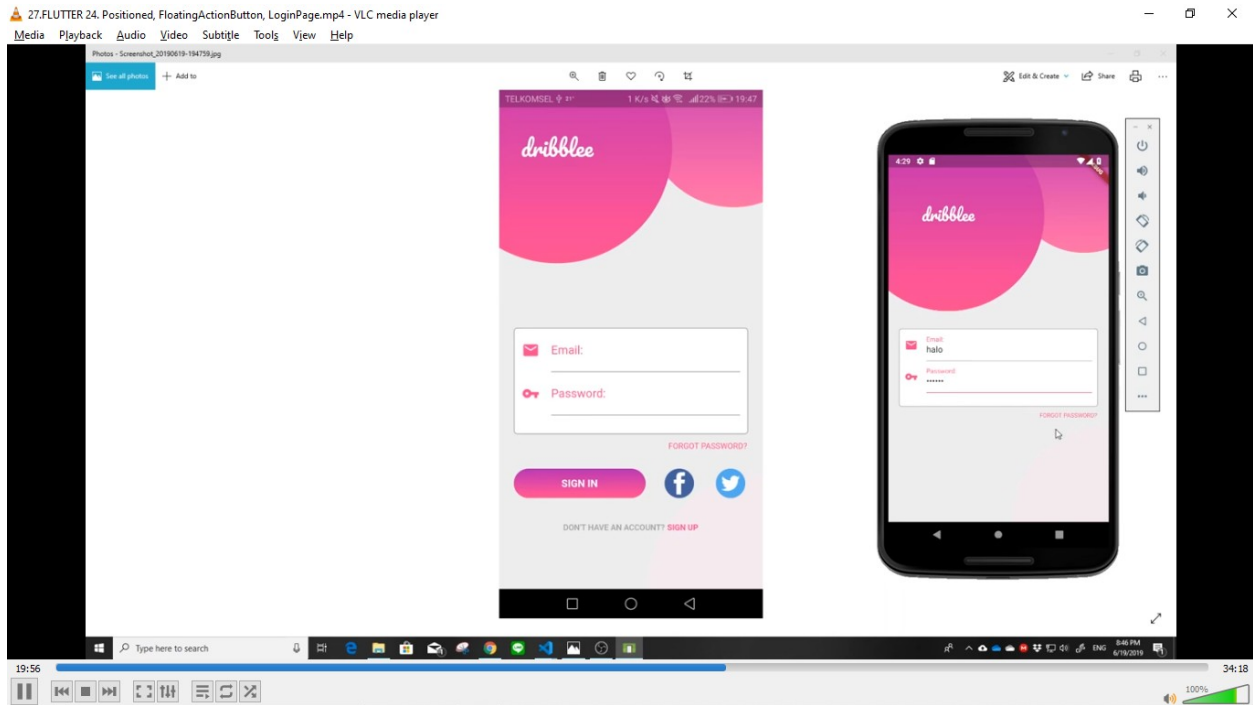

Setealh container lalu text

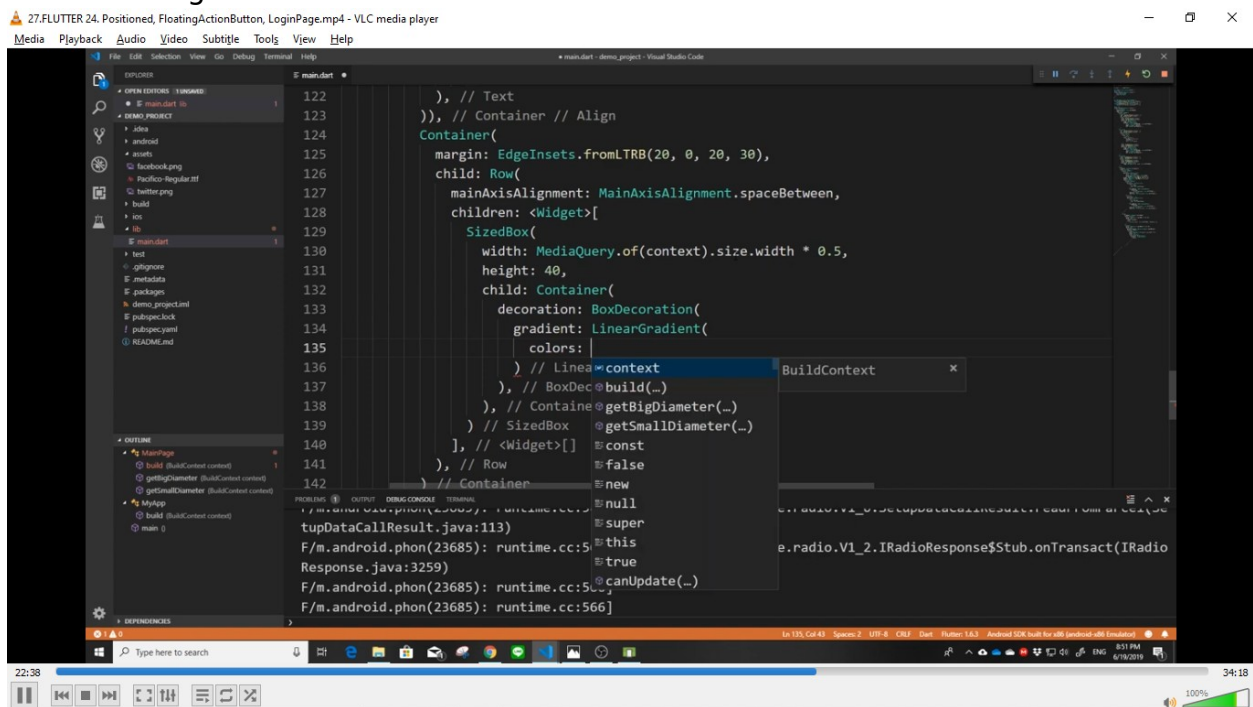

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

Media Playback Audio Video Subtitle Tools View Help

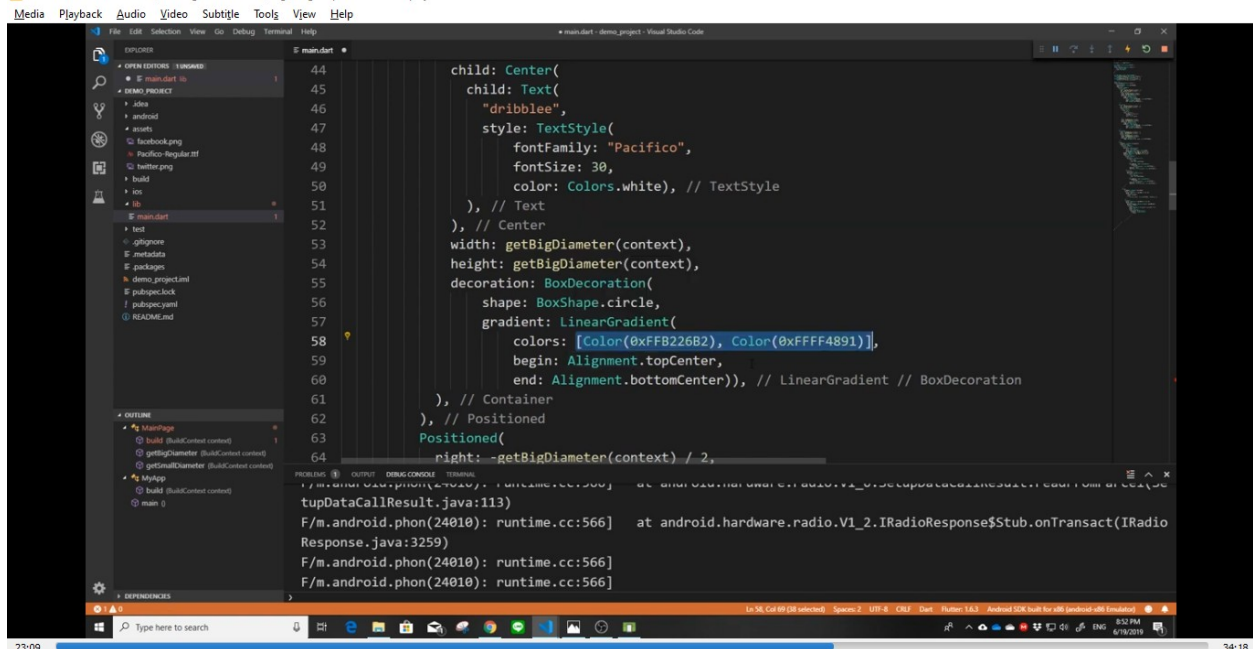

disini boton guna container

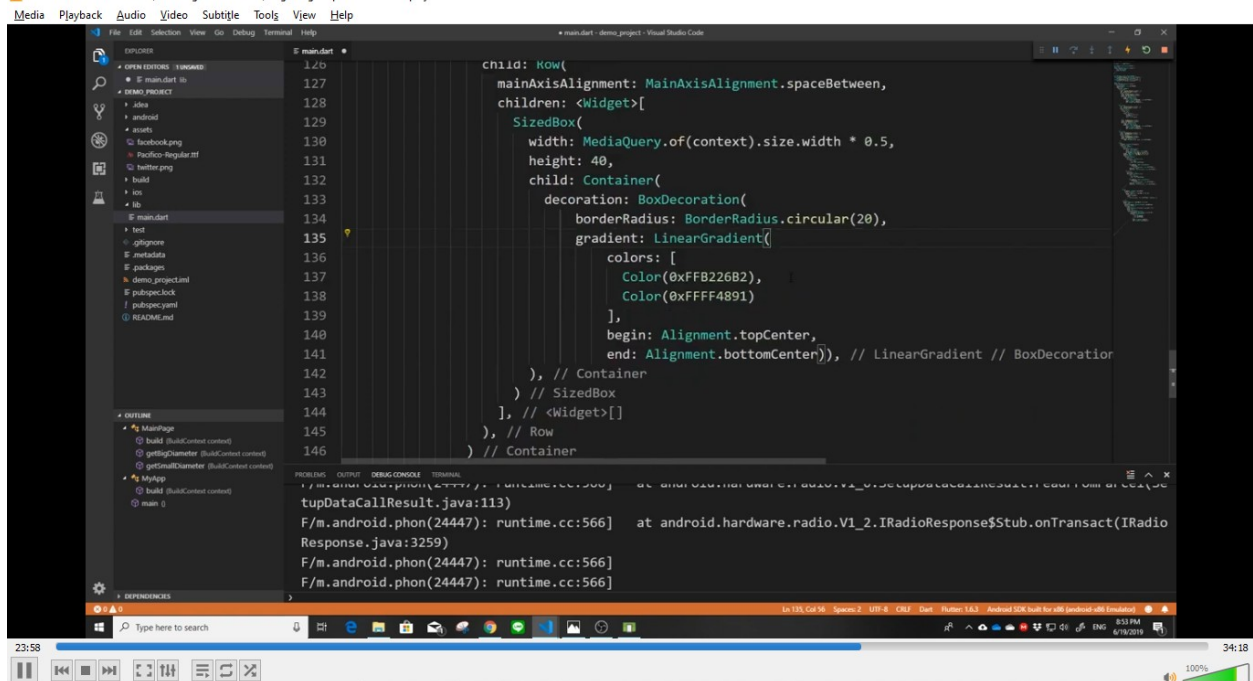

Color samakan dgn linkaran besar
Copy color

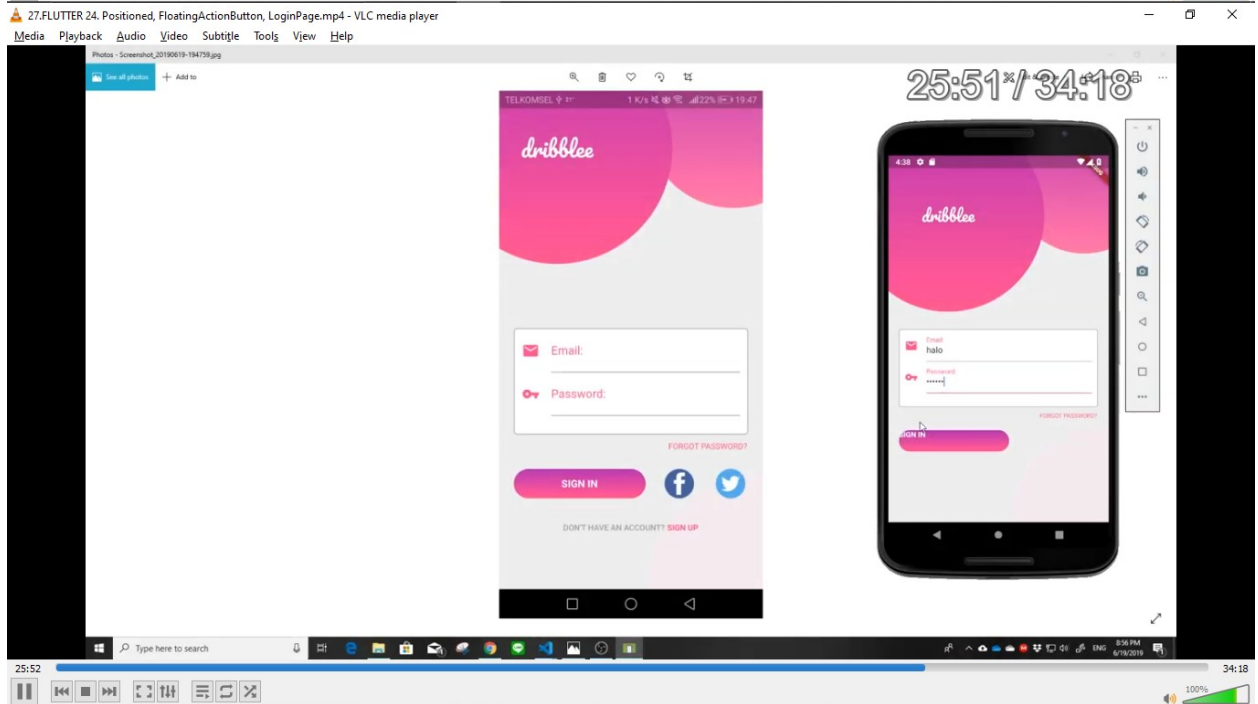

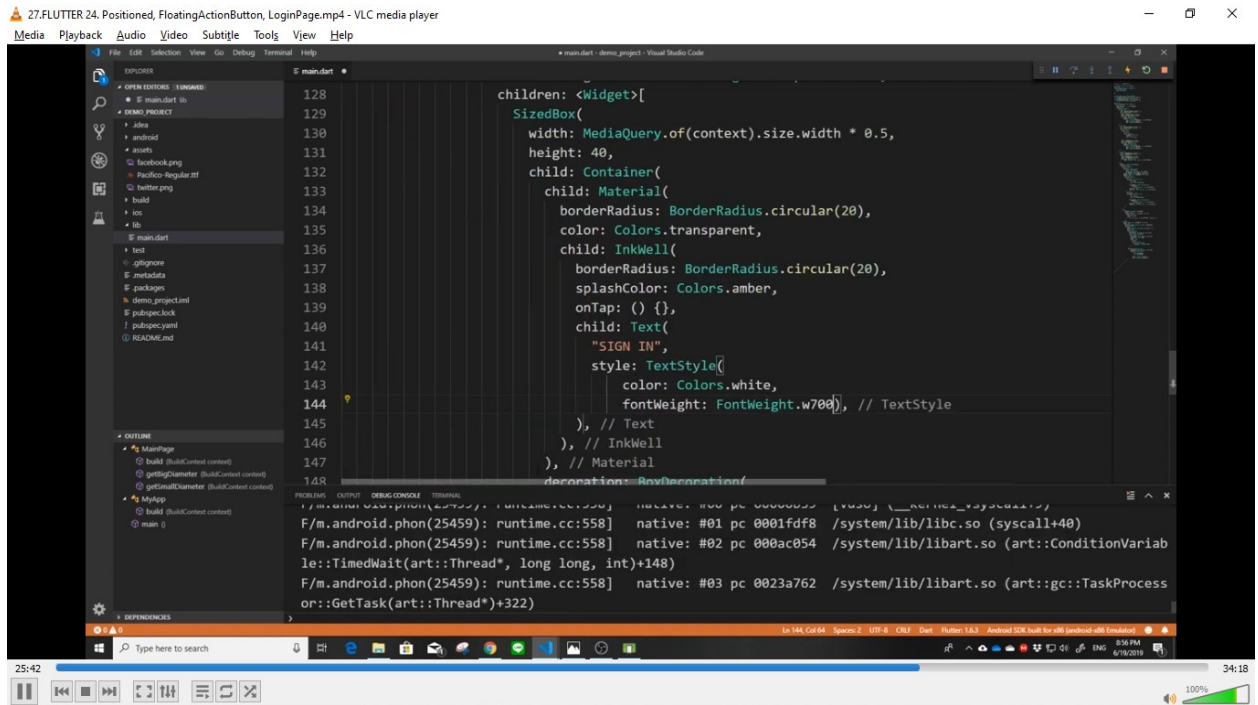

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

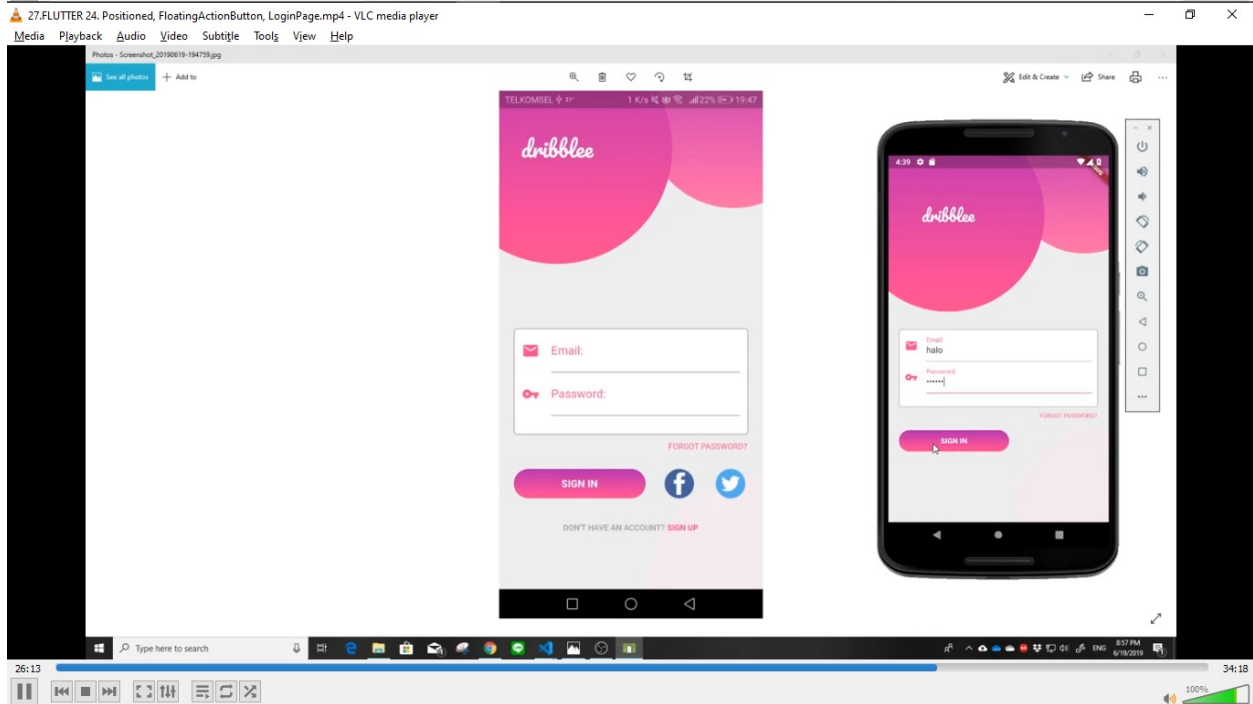

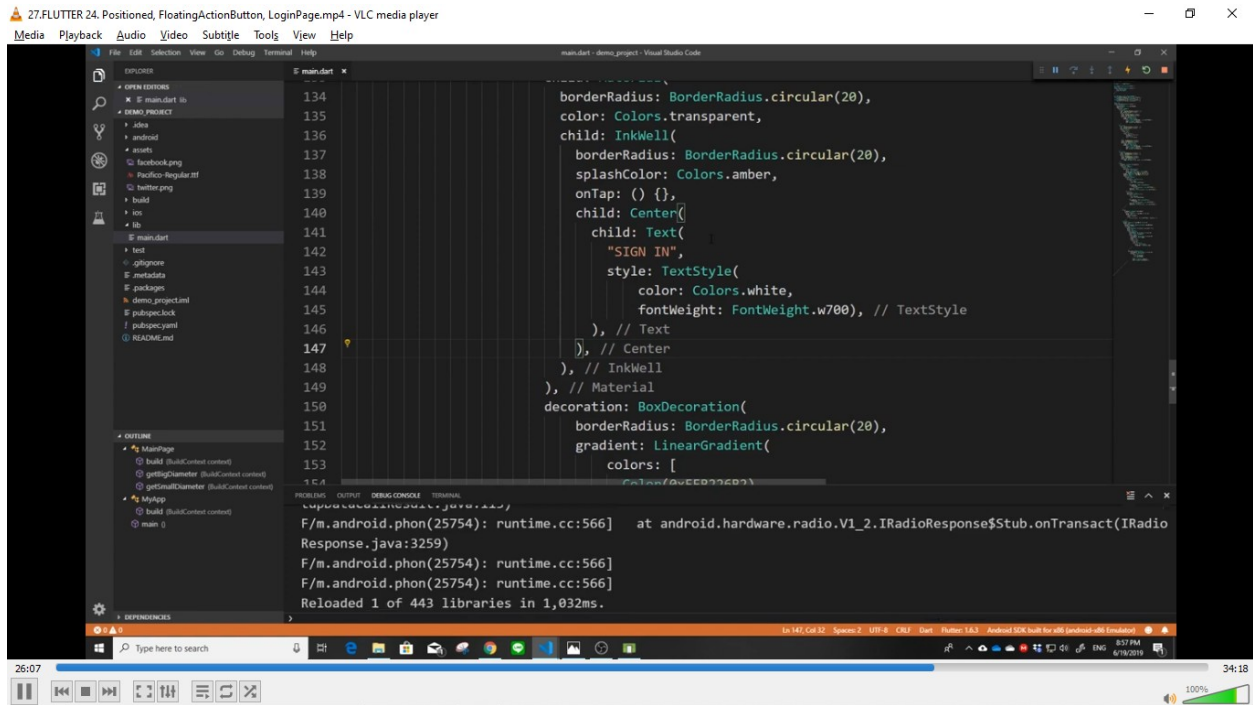

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

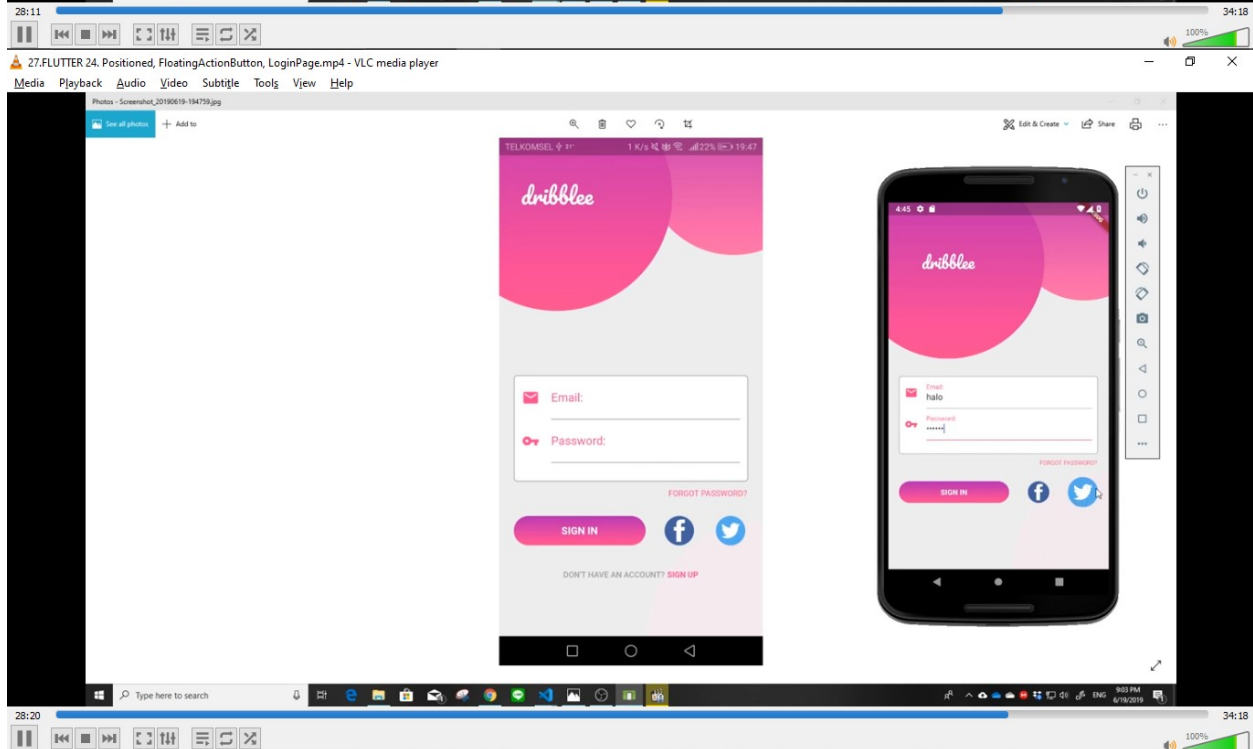

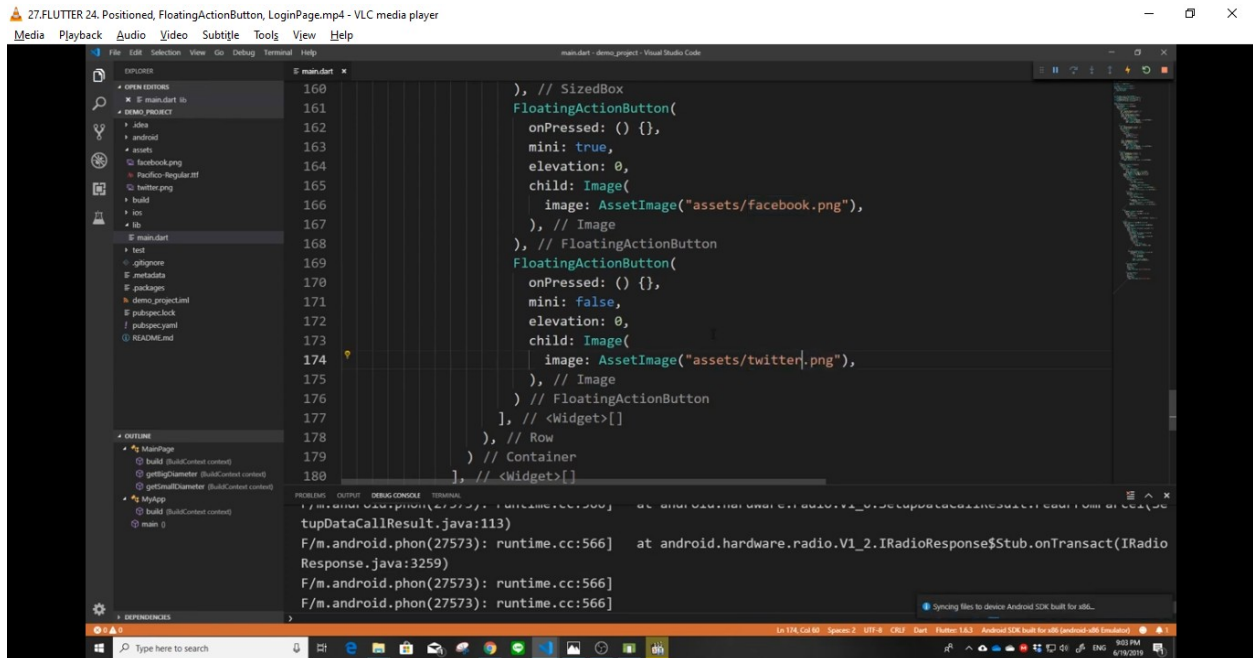

Didalamn container kasih material border radius j8uga sama

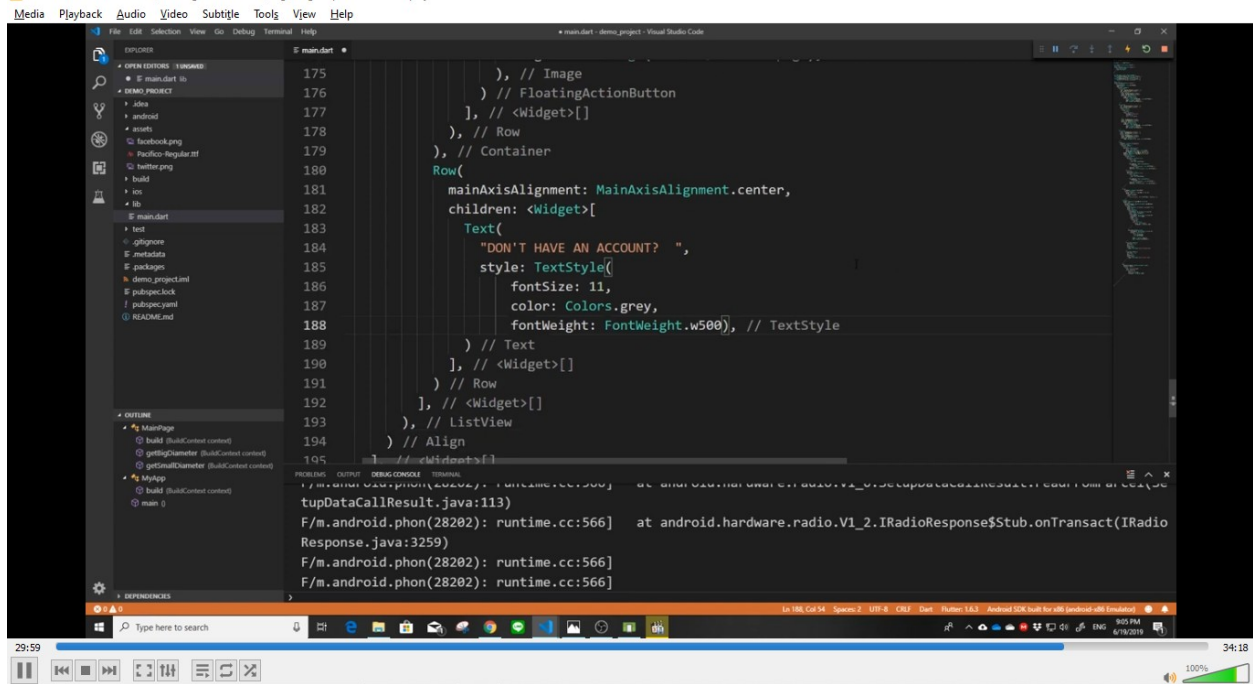

Diklik maka menjadi kuning amber
 Buat facebook setelah sizedbox
 Mini true versi mini

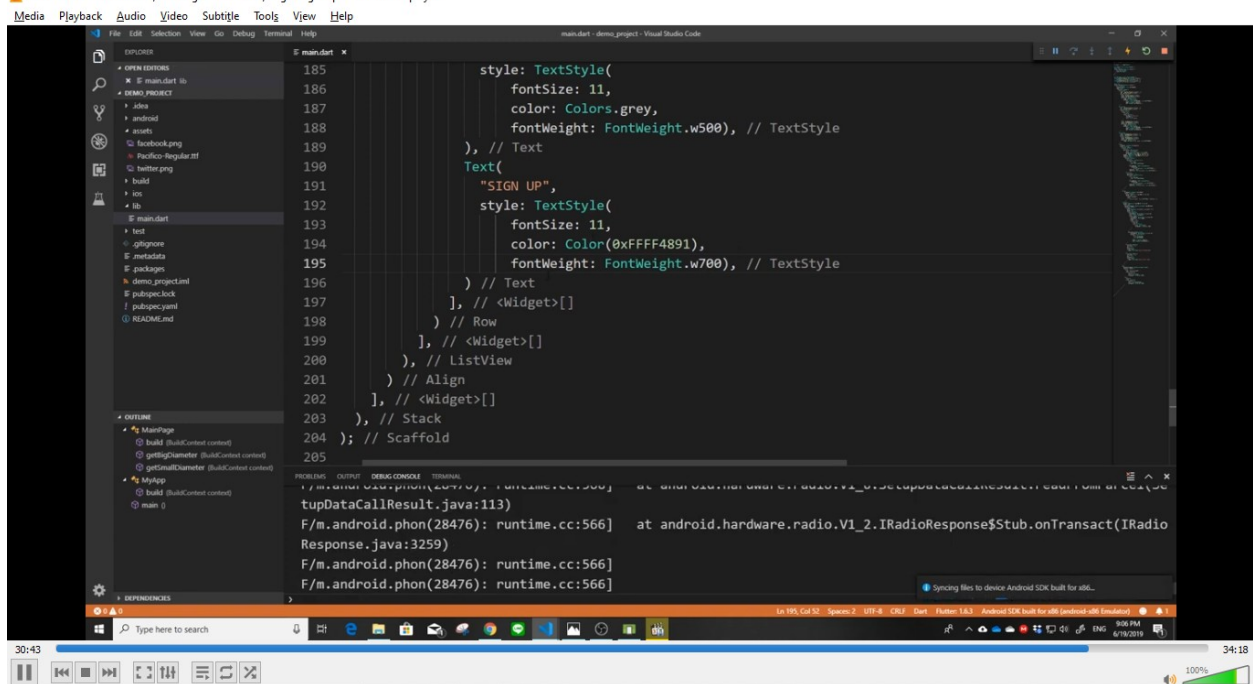

Kalau tidak pakai mini maka menjadi besar
 Ganti jadi true
 Setelah container beri true lagi

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

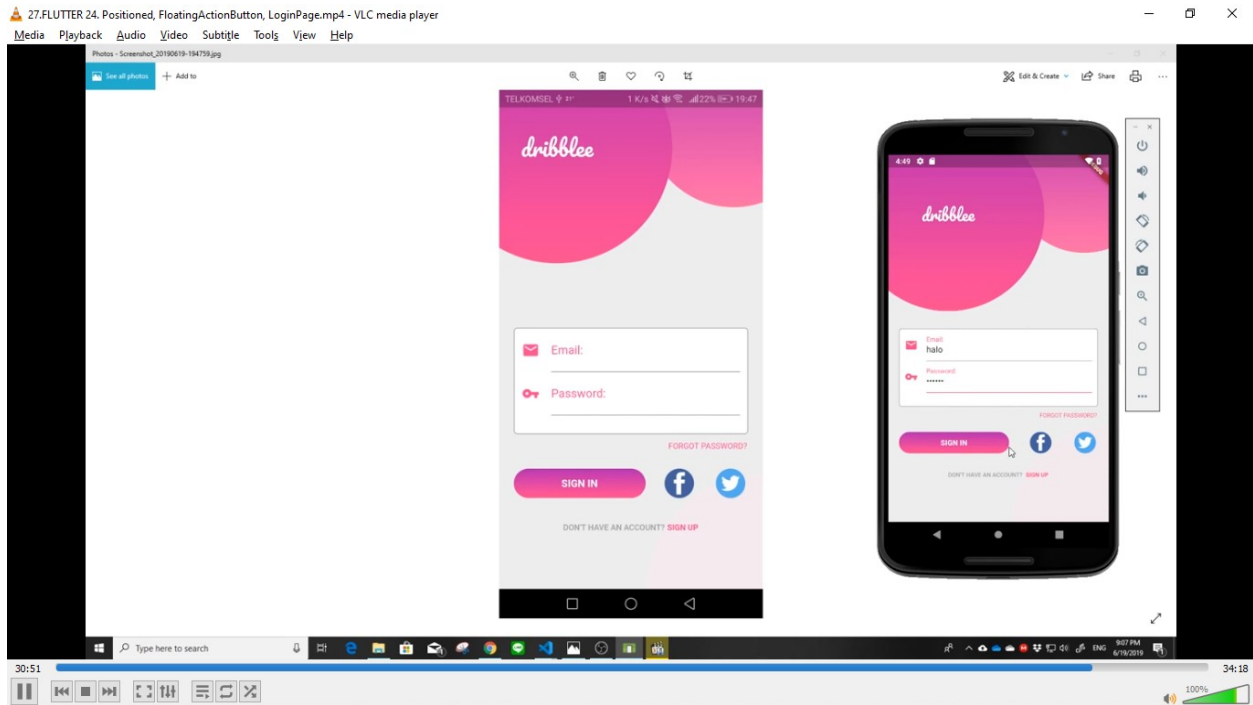

Setelah itu copy

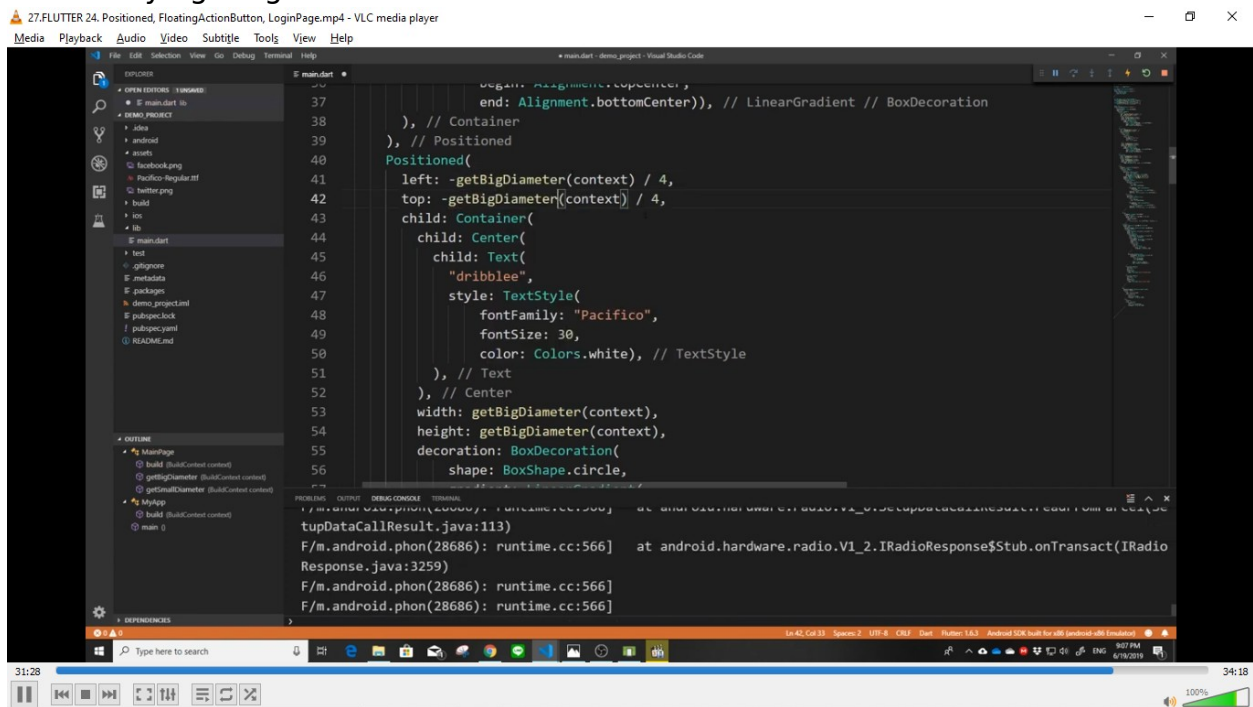

27.FLUTTER 24. Positioned, FloatingActionButton, LoginPage.mp4 - VLC media player

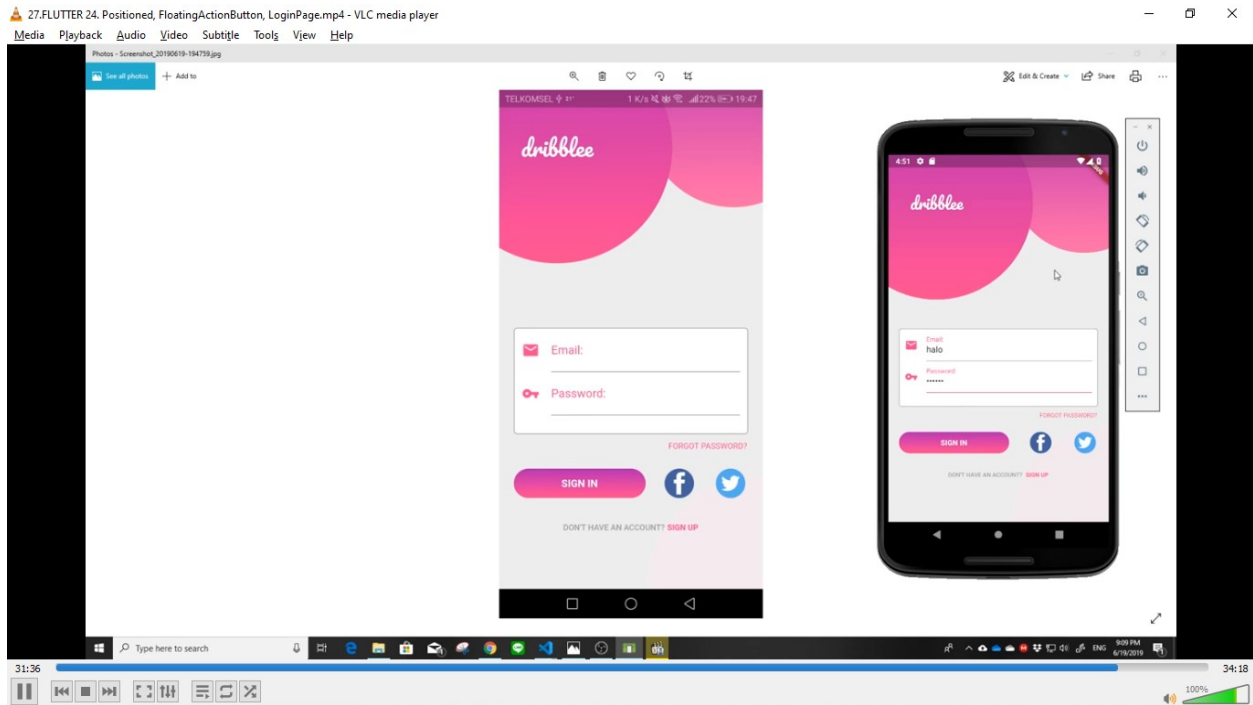

Lihat

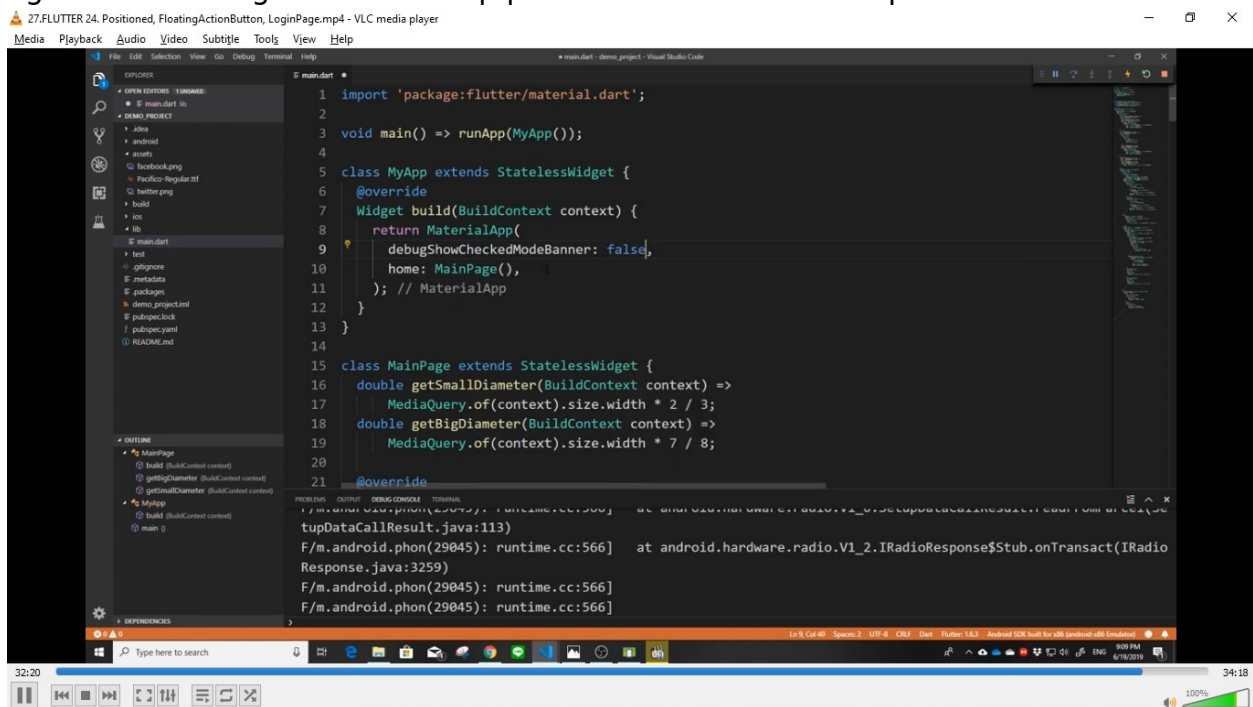

Ini terlalu bawah
Seharusnya getbig

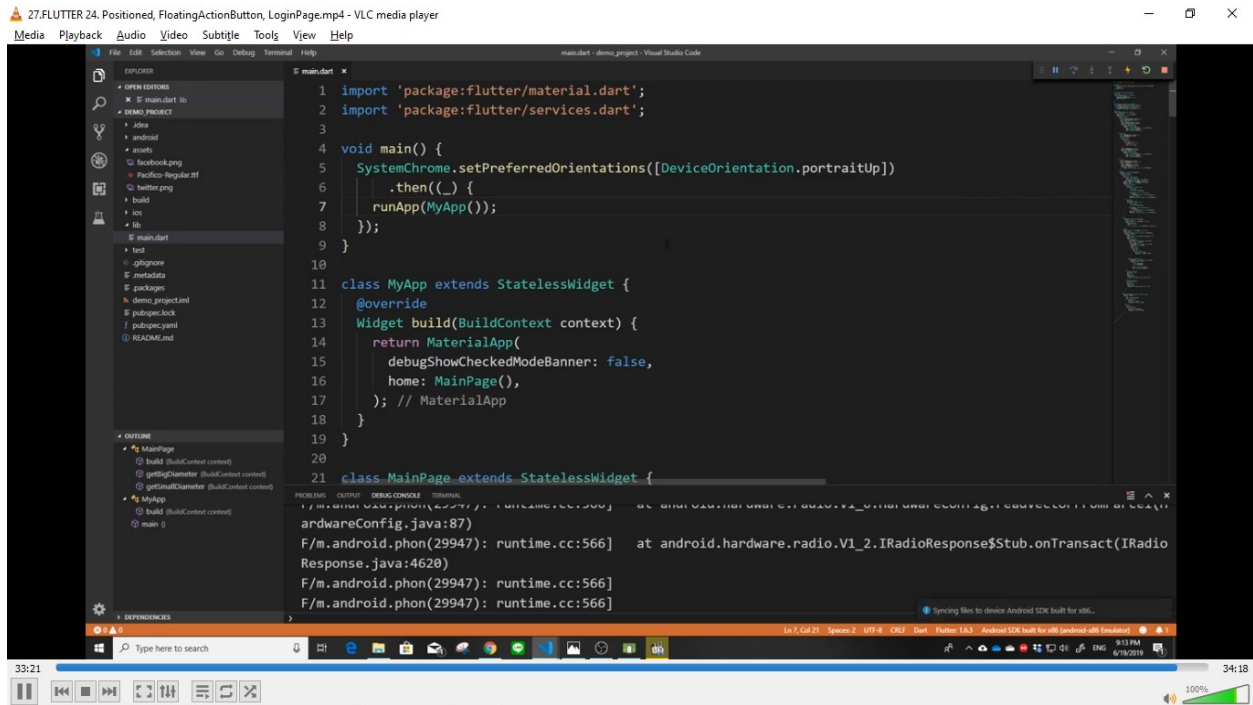

Yg terakhir debug dan buat tetap potrait tidak usah landscape

Supaya tidak debug
Supaya potrait

Dimainya Guling tetap
